

RBV Detox Foot Spa

Total Body Cleanse

Whether we like it or not, we are constantly exposed to chemical and heavy metal residues, tissue acid wastes and stress. Using the relaxing RBV Detox Foot Spa for only a thirty-minute session will visibly remove toxins and waste products from your body – see for yourself!

*Within a couple minutes
of starting RBV Foot Spa*

*30 minutes after using
RBV Foot Spa*

Why Detoxify?

We live in a society fraught with pollutants and toxins – natural and synthetic. They exist in our air, water, food, clothing and the environments in which we live, work, play and sleep. Cigarettes, alcohol and caffeine are also major sources of toxins.

With our society's busy lifestyles and the increasing pollution in the environment, our bodies are encountering and storing unwanted toxins on a daily basis. Tissue acid wastes, chemicals and heavy metal residues now build up in our body faster than ever before, resulting in a greater incidence of allergies and mental and physical incapacitation. Pimples, rashes, dark circles under the eyes, swollen joints, often indicate a build-up of tissue acid wastes inside the body.

Our bodies are depleted of crucial life-giving elements, leaving us to feel drained of energy or unable to heal naturally from illness, injury or medical procedures.

To relieve the strains on our organs, particularly the kidneys, liver, intestines and immune system, it is more important than ever to maintain a detoxification regimen.

The RBV Detox Foot Spa is designed to relieve these strains and detoxify the body through the skin, the largest organ in the human body.

Anyone who suffers from allergies, swollen joints, rashes, arthritis, multiple sclerosis, parkinson's, blotched complexions, pimples, dark circles, chronic fatigue or high blood pressure will benefit from this non-invasive and therapeutic treatment.

Benefits of Detoxification

Benefits of detoxifying may include:

- Removes toxins and body waste products that can cause health problems
- Heavy metal removal
- Faster recovery time from illness, accident or surgery
- Reduced inflammation and fluid retention
- Enhanced nutrient absorption
- Increased oxygen levels and energy
- Inactivation of viruses, bacteria, yeast and fungus

After a session most people experience feeling lighter, with a greater sense of overall well-being, increased energy and improved focus. Many people with pain, edema, gout, swollen or deteriorating joints report considerable symptomatic relief from their RBV Detox Foot Spa session(s).

Even though you may feel this relief, it should be noted that RBV Detox Foot Spa treatments do not heal or cure diseases and conditions directly. The role of RBV Detox Foot Spa cleanse system should be viewed as that of a relaxing alternative therapy for reducing unwanted toxins from the body; it is only an aid in the healing process carried out by your immune system. So the Detox Foot Spa detoxification and cleanse technology is only a valuable way of assisting the body to detoxify its organs and tissues. This detoxification and cleansing process miraculously aids in the healing process carried out by our immune system.

How Does the Detox Foot Spa Work?

An ion is a charged atom or molecule that has gained or lost an electron, thus creating an electro-magnetic field capable of neutralizing oppositely charged particles such as toxins in the human body.

The ions produced by RBV Detox Foot Spa create a gentle vibration that aids the release of unwanted toxin particles through the pores on the sole of the foot. There are over 2,000 pores on each foot!

Ion producing technology has been around for several decades, but the secret to its successful use in body detoxification is the production of positive and negative ions in the same treatment.

The control head of RBV Detox Foot Spa unit delivers an electrical current through the array that is placed into the water alongside the feet. The low-level direct current to the array causes the metals within the array in combination with water and salt to generate positively and negatively charged ions by separating the oxygen and hydrogen components of water. RBV Detox Foot Spa system allows the negative ions to travel through the body and attach themselves to toxic substances with the opposite charge.

Since most toxins in our body are positive in charge, they will be conveniently neutralized and drawn out by the negative ions produced by RBV Detox Foot Spa. Toxin particles are pulled through the skin and out of the body via osmosis and neutralized because they are attracted by the highly concentrated ion field in RBV Detox Foot Spa water.

Contraindications

RBV Detox Foot Spa should not be used by:

- Persons with a pacemaker or any other battery-operated or electrical implant.
- Person who is on heartbeat regulating medication
- Pregnant women and breast-feeding mothers
- Organ transplant recipients
- Persons having an organ removed, especially the colon
- Persons taking a medication, the absence of which would mentally or physically incapacitate them (eg: psychotic episodes, seizures etc.)
